university of southern mississippi bulletin

Blending traditional programs with the new, the University of Southern Mississippi has developed the career concept of higher education to prepare young men and women for meaningful and profitable careers in a changing society. Stressing programs geared to assisting students on an individual basis, Southern enables graduates to take their rightful places in their respective job markets.

Business and industrial advisory boards have been established to assist with curriculum development in order to assure that career programs will be kept up-to-date, practical, and pertinent. Through the Career Development Center and other offices, a careful check is maintained on the job market in order that programs are offered to meet current and future needs. Out-of-date programs are replaced by innovative, profitable career programs.

Dates to Remember:
USM's Junior College Conference: October 22, 1976

Phi Theta Kappa Convention November 7-8, 1976

Junior College Day: December 10, 1976

High School Day "Spring Roundup" April 1, 1977

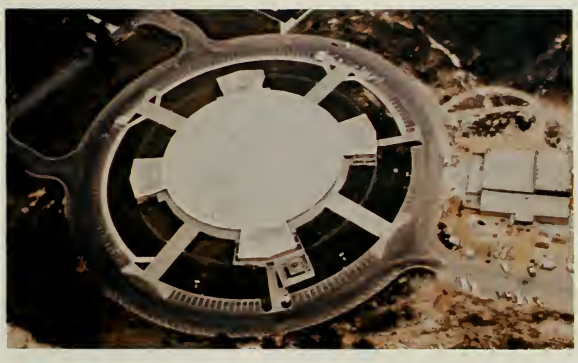
CAREER UNIVERSITY

The University has established many interdisciplinary programs in which students majoring in a professional area will take courses in their majors in several academic departments. Regular programs include those for bachelor's, master's, specialist's, and doctoral degrees. Pre-professional training includes everything from pre-medical and pre-dental to pre-engineering. Through the Division of Extension and Public Service, the University carries education to areas where it is requested through extension and non-credit courses.

Research at USM provides exciting, practical activities aimed at training students and at the same time assisting industry and business, such as that of USM researchers who designed new polymers that have saved the paint industry millions of dollars.

This practical stress of combining career-oriented academic programs with on-the-job internships, service, and research has made the University of Southern Mississippi a truly distinguished career university.

UNIVERSITY OF SOUTHERN MISSISSIPPI



A multi-purpose institution, the University of Southern Mississippi believes that its fundamental mission is to fulfill the educational needs of the people in its changing state and region. To meet these needs, the University is a dynamic institution, committed to excellence in its programs and services. As such, the University sees its purpose as threefold: teaching, research, and service.

While research is important, and kept on a practical plane, its role is that of serving, supporting, and complementing teaching. Through service, the University seeks to incorporate the resources of knowledge, skills and artistry into the mainstream of the society it serves.

USM was established by an act of the Legislature on March 30, 1910, as the Mississippi Normal College, with an original purpose of training teachers for the rural schools of Mississippi. On March 7, 1924, the Legislature changed the name to State Teachers College. On Feb. 8, 1940, the Legislature changed the name to Mississippi Southern College, and on Feb. 27, 1962, the Legislature changed the name to the University of Southern Mississippi.

There are vice presidents responsible for their respective areas in academic affairs, student services, business and finance, administration and regional campuses, as well as a Director of Intercollegiate Athletics — for the athletic program.

USM BULLETIN
September 1, 1976
VOLUME 64 NUMBER 1

Published Quarterly by the University of Southern Mississippi, Hattiesburg, Mississippi. Entered as second-class matter February 19, 1917, at the Post Office at Hattiesburg, Mississippi, under Act of August, 24, 1912.

A MODERN CAMPUS

The Southern scene is one of constant change — especially when it comes to campus buildings!

Responsive to the needs of a growing student body, new structures are a part of the growth pattern, as is the change in usage of buildings, normally accompanied by some remodeling.

Venerable Southern Hall is one of the latest to have a face lifting, emerging as a comfortable centrally air-conditioned and heated, well-lighted classroom structure.

A new Union Building, to replace an existing one which has been outgrown, is almost completed. Because Southern students are big team supporters, the stadium at USM is being added to — and will have a doubled seating capacity on completion.

School of Nursing students — and their faculty — can't help but appreciate their modern classroom, office, and laboratory building on the western outskirts of the campus.

EXCITING PEOPLE

usm where TOMORROW is TODAY

STUDENT LIFE

Life at the University of Southern Mississippi is student life in every way.

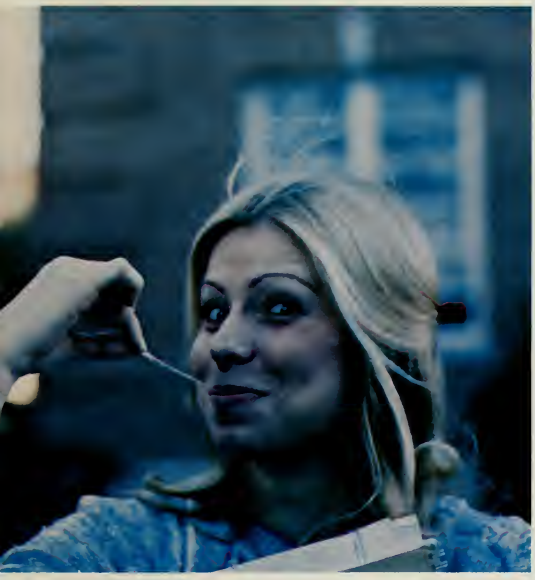
Great care has been taken to insure that the out-of-class experiences of students contribute to education as much as in-class experiences.

The Greek system comprises the largest organized segment of the student body. Twenty-one social Greek letter organizations comprise the fraternity and sorority program.

Aside from these activities are over one hundred fifty campus organizations of most every type and size, to give the student a wide choice of interest groups and associations.

The Associated Student Body serves as a liaison between the administration and student body; the University Activities Council functions as the programming segment of the University Union, both major bodies rendering services to the USM students.

Involvement in the majority of student life is there for the asking; organizations, activity groups, religious functions, but, for others achievement marks their groups, the honoraries, both for scholastic and leadership excellence, in all levels of University life.



Whatever the involvement in student life, whether it is a leadership role in student activities, a campus organization, student government, or . . . just being a student, there is a place for you at Southern.

Early Admission

On occasion the University will admit highly qualified applicants who have not graduated from high school. To be considered for early admission, the applicant must have achieved an exceptional record on a minimum of fifteen (15) units in an accredited high school, have the unqualified recommendation of his principal or headmaster, and have achieved a score of twenty-three (23) or above on the American College Test. A personal interview with the Dean of Admissions is required before a decision is made.

Phi Theta Kappa

Alpha of Mississippi, the Phi Theta Kappa Alumni Association at USM, became the first alumni chapter at a senior institution to be chartered in the nation.

The purpose of Alpha of Mississippi is to continue to uphold the purposes of Phi Theta Kappa and to provide a continued fellowship of all former PTK members.

The University of Southern Mississippi is proud to have set a precedent for continued promotion of the ideals of this great organization.

Spring Roundup

USM's Spring Roundup allows high school students the opportunity to visit the campus, discuss academic programs with deans and department chairmen, tour the campus with a group leader, enjoy entertainment, attend fraternity and sorority open house, and participate in a field day of activities such as a dance, pie-eating contest, sack races, horse show, and other gala events at the USM Golf Course. April 1, is the date. No fooling!!

GENERAL INFORMATION

Mini Quarter

Mini Quarter at the University of Southern Mississippi is an orientation and pre-registration program for new freshmen and transfer students. It is being conducted to aid the new student in taking advantage of the career opportunities available at the University.

Mini Quarter participation is available to those students who have applied to the University of Southern Mississippi for the Fall Quarter, and who will meet all criteria required in the current ***Bulletin*** for admission prior to the beginning of Fall Quarter. Transfer students must be admitted to the University or provide official transcripts which show a grade point average as required in the current catalog. Students enrolled in summer school must complete their summer work satisfactorily.

Freshman sessions are two days and two nights, and transfer sessions last for one day and one night. These days will be spent getting acquainted with the University structure, policies, and procedures, and with the campus, its atmosphere, faculty, students, and physical layouts. Perhaps most important: the student will register for Fall classes after talking individually with his academic adviser. He will take part in small group sessions with student leaders and faculty. He will also have an opportunity to join campus organizations in which he may have an interest. As a result, the students should feel they are a vital part of the University prior to their arrival in the fall. One semester hour of college credit will be awarded to the respective student who completes one entire orientation session and who returns to the University for one academic term.

Freshman placement tests will be given in the areas of Chemistry, Mathematics, Foreign Language and Music Theory to those students who believe that they have the training necessary to omit an introductory course in any or all of those areas.

Freshman parents are allowed to participate in the Mini Quarter program through the dinner of the first night, or they may elect to attend throughout the entire three-day session.

Students wishing to pre-register for the Fall Quarter should attend Mini Quarter.

Special seminars are planned for veterans, adults, minority groups, residence hall students, commuters, etc.

Springboard

Purpose:
Academically talented high school students are provided with the challenge to achieve in college level courses. The opportunity is available to explore courses in fields that are not available in high schools in pursuit of career interest. Early exposure to life on a college campus relieves anxieties in regard to adjustment to dormitory life, student activities, methods of teaching, types of examinations, and use of free time to its best advantage.

Offerings:

The program offers the student curriculum and adjustment to life on a college campus. The course made available to high school students selected for the program will be regular courses scheduled for the quarter. The curriculum will not involve special courses or a special summer term. Full credit will be awarded but will be held in abeyance until the student is admitted to college as a regular college student. Regular fees will be applicable. A student may not take courses available to him during his senior year in high school.

ACT-APP

In the fall of 1974, the University of Southern Mississippi adopted ACT-APP, a program whereby high school seniors who have a composite score of fifteen (15) or above are automatically given tentative acceptance without having to file an Admissions Application form. This program makes applying for admission simpler and easier for students and for the University. Applicants are not placed under any additional obligation by this program. ACT-APP is applicable only to incoming freshmen without any college work. Final acceptance is awarded after high school graduation.

Non ACT-APP Freshmen

Students who do not list USM as their first or second choice of schools to receive their ACT results may still attend by filing the traditional application form with the Admissions Office. Scores from the American College Test must be received before applications can be processed. High school transcripts should be furnished after graduation.

Transfer Students

Persons who are seeking admission to the University as an undergraduate, and who have attended other colleges or universities, are required to file an application for admission with the Office of Admissions. Students should request the registrar(s) at the college(s) previously attended to furnish the Director of Admissions at the University of Southern Mississippi with an official transcript of their work. An official transcript must be submitted from every college attended. A student who has earned less than twelve (12) semester hours must also present results from the American College Test.

Students transferring to USM must be eligible to return in good standing to the institution last attended, and must present a grade point average of at least 2.00 on a 4.00 system ("C" average).

Financial Assistance

SCHOLARSHIPS — This form of aid includes: Merit Scholarships, (academic), Regional Merit Scholarships (waiver of non-resident fee), and Service Scholarships (band, music, athletics, etc.). Merit and Regional Scholarships are based on academic record, test scores, citizenship record, and, in many cases, financial need. Service Scholarships are based upon skill and performance in such endeavor as music and athletic ability.

BASIC EDUCATIONAL OPPORTUNITY GRANT (BEOG) — The BEOG program has become the base for all assistance **(Federally Funded)**; therefore, it is of extreme importance that you apply for this program as soon as application forms become available. As the various laws presently exist, it is quite possible that you can be entitled to receive a BEOG, and at the same time not justify need for other federally funded programs and **vice versa.** THE WORD TO THE WISE IS "APPLY."

COLLEGE WORK STUDY PROGRAM — Work Study provides part-time employment, usually up to 15 hours per week, for students with demonstrated financial need. Students working under the program receive at least the minimum wage.

or USM WORK PROGRAM — Institutional wage payroll (non-federal support) jobs under this program are awarded to students based upon their desire and ability to perform a job. Need is a consideration but not a limiting factor.

NATIONAL DIRECT STUDENT LOANS — These loans are made with a three percent interest and are available to students with financial need. Borrowers pay no interest while in college and do not begin repayment until one year after leaving college. Nursing students are NOT eligible for this loan.

FEDERALLY INSURED LOANS — These loans are primarily made by commercial banks, savings and loan associations, and credit unions. For those who qualify, the Federal government pays the interest while the student is in school and for nine months after last date of at least half-time enrollment. There is a seven percent interest rate on these loans.

NURSING STUDENT LOANS — This loan is available to students of demonstrated need majoring in nursing. Interest does not accrue until after leaving college, or the student ceases to be in at least one-half time attendance.

SUPPLEMENTARY EDUCATIONAL OPPORTUNITY GRANTS — Grants of up to $1,500.00 a year to students with "exceptional need" (in most cases these are students whose families can provide less than one-half the funds required).

APPLICATIONS FOR THE NATIONAL DIRECT STUDENT LOAN, SUPPLEMENTARY EDUCATIONAL OPPORTUNITY GRANT AND COLLEGE WORK-STUDY PROGRAM CANNOT BE CONSIDERED UNTIL THE APPLICANT SHOWS EVIDENCE OF HIS OR HER ELIGIBILITY OR INELIGIBILITY FOR A BASIC EDUCATIONAL OPPORTUNITY GRANT.

FOR MORE INFORMATION AND APPLICATIONS CONTACT:
Director of Student Aids
University of Southern Mississippi
Southern Station
Box 101
Hattiesburg, Mississippi 39401

THE HONORS COLLEGE

The University Honors College encourages the pursuit of academic excellence, by students of high intellectual promise, through offering special opportunities for independent study, interdisciplinary courses, and honors sections of many core courses. Though the Honors College has its own faculty, close relationships are maintained with all colleges and schools of the University. Students of all majors are accepted into the Honors College by invitation of the University Honors Council, which makes selections on the basis of a student's high school grades, ACT scores, personal recommendations, a personal interview, and an extemporaneous essay. Students wishing to apply should write to Box 5162, Southern Station, USM.

Honor Scholarships

PRESIDENTIAL SCHOLARSHIP — Four presidential scholars shall be selected by the President of the University of Southern Mississippi. These scholarships will be underwritten by the Alumni Association and will be in the amount of $6000. Applicants are expected to have superior ACT scores and high school grade point averages and to have demonstrated leadership ability. Write Honors College, Southern Station Box 5162, Hattiesburg, Miss., 39401.

UNIVERSITY SCHOLARS — Prospective freshmen students with American College Test scores of 28 through 36 and grade point averages of 3.50 or above and are selected for the Honors College shall be awarded $1,200 scholarships upon entrance to the University, given in increments of $100 per quarter. Write Honors College, Southern Station, Box 5162, Hattiesburg, Miss. 39401.

USM ACHIEVEMENT SCHOLARS — Prospective freshmen students with American College Test scores of 25 through 27 and grade point averages of 3.00 or above shall be awarded a $100 scholarship from the Alumni Association upon entrance to the University. Write Director of High School and Junior College Relations, Southern Station Box 11, Hattiesburg, Miss., 39401.

PHI THETA KAPPA SCHOLARS — Members of Phi Theta Kappa from any Mississippi junior college shall be awarded $200 scholarships given in four increments. Write Phi Theta Kappa Advisor, Southern Station, Box 11, Hattiesburg, Miss., 39401.

DEPARTMENTAL SCHOLARSHIPS — Scholarships are offered by various departments for excellence in a given area of study. Interest in applying to departments should be expressed by writing to the specific department chairman.

GENERAL ACADEMIC — Write Director of Student Aid and Scholarships, Southern Station, Box 101, Hattiesburg, Miss., 39401 for scholarships for out-of-state waiver, Alumni scholarships, etc.

Honor Organizations

There are five general honor societies on the campus. A general honor society is an association that receives into membership individuals who have achieved high scholarship and who fulfill such additional requirements of distinction in some broad field of education and culture or in general leadership as the society has established. Phi Kappa Phi is a national honor society composed of men and women who have achieved superior recognition for scholarship accorded by the University. Omicron Delta Kappa is a national honorary leadership society, membership in which is the highest recognition accorded students of the University. Phi Delta Rho is a local honorary leadership society, membership in which is the highest recognition accorded women students of the University. Alpha Lambda Delta and Phi Eta Sigma are national honor societies which aim to encourage and reward high scholastic attainment among freshman students.

STUDENT ACTIVITIES

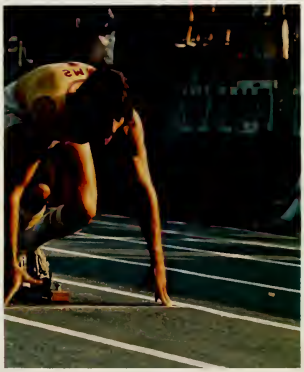
That collage of events at Southern, as on many campuses, that provide an assortment of social, recreational, and cultural outlets for students is called student activities.

A very vital part of student life, student activities at USM are termed 'co-curricular', as opposed to the traditional extra-curricular term. This category is used because the entire area is designed to be a continuation of the learning process that is started in the classroom, and continued through informal, out-of-class planning and presenting of activities.

Two of the largest activity groups, touching possibly the largest segment of the student body, are the University Activities Council (UAC) and the Associated Student Body (ASB).

The Associated Student Body is the student governmental organization, serving the student from two aspects: first, as an individual; and secondly as a part of the student body.

For the individual, the ASB provides a number of services to benefit the student. Most popular service programs are: Tutorial, short term loan, health and accident insurance, refrigerator rentals, ride board, spouse cards, part-time employment, and many more. Publications include the student handbook, ***The Drawl,*** and a teacher evaluation book, ***The Keyhole.***



Many students find their university years are a time when they work out what they really believe about life, themselves, and how to get along with other people. This brings to mind the religious life at Southern. Most Christian denominations have organized student groups and strong programs. Interdenominational groups provide this type activity for the non-denominational affiliated student.

A wide variety of activities awaits the participant in the religious life activities: bible studies, coffeehouses, masses, lecturers, retreats, recreation, service projects and others.

The University Chaplain is the religious life coordinator.

The student body as a whole reaps benefits from the ASB with committees involved in recruitment, welcome and orientation, foreign students, minority students, school spirit, and other items as they occur. Advisory boards bring together both the University and city administrations with student leaders for greater communication and benefits of students.

The programming department of the University Union is the University Activities Council (UAC). Selection of UAC members is on the basis of an application interview arrangement as vacancies occur on the Council.

UAC activities generally center in the concert, film, and lecturer areas.

A sampling of activities include:
Spring Fever Week, Mardi Gras Ball, weekly movies, name concerts (Spinners, Jerry Jeff Walker, Bob Dylan, Country Gentlemen), lecturers (Al Capp, Judith Crist, Pat Paulson, etc.), coffeehouses, tournaments, and assorted special events.

A Greek contributes greatly to the campus through service to community and campus, social activities, participation in sports, and outstanding leadership and scholarship. Greeks experience practical application of leadership training. Members of fraternities and sororities are found in leadership and top roles in all walks of student life.

Ever heard of innertube water polo? That is just one of the great variety of activities available to participants in the intramural sports program. The intramural sports program is designed to provide opportunities for participation in a wide variety of sports for the entire University community.

Included are offerings for men, women, and a co-ed program. It is firmly believed that active involvement in the intramural sports program can add to the enjoyment of college life, and assist in gaining many new and worthy friendships.

Academic Calendar 1976-77

First Term, Fall Quarter 1976

SEPTEMBER	5	Sunday	Dormitories open
	6-7	Mon.-Tue.	Orientation for new students not attending Mini Quarter Registration by appointment
	8	Wednesday	Day classes meet on schedule
		1:30 p.m.	Change of schedule and late registration

Second Term, Fall Quarter 1976

OCTOBER	18	Monday	Registration for second term courses
NOVEMBER	15-16	Mon.-Tue.	
	17-18	Wed.-Thur.	Fall Quarter Examinations

First Term, Winter Quarter 1976

NOVEMBER	29-30	Mon.-Tue.	Registration by appointment Orientation for new students not pre-registered
DECEMBER	1	Wednesday	Day classes meet on schedule
		1:30 p.m.	Change of schedule and late registration
	8	Wednesday	Last day for registering or adding full term Winter Quarter courses
	17	Friday	CHRISTMAS HOLIDAYS begin
JANUARY	3	Monday	Class work resumes (night classes meet)

Second Term, Winter Quarter 1977

JANUARY	19	Wednesday	Beginning of second term of Winter Quarter — only date for registering for second term courses
FEBRUARY	21-22	Mon.-Tue.	
	23-24	Wed.-Thur.	Winter Quarter Examinations

First Term, Spring Quarter 1977

MARCH	7-8	Mon.-Tue.	Registration by appointment Orientation for new students not pre-registered
	9	Wednesday	Day classes meet on schedule
	30	Wednesday	University of Southern Mississippi Day
APRIL	7	10:00 p.m.	EASTER HOLIDAYS begin
	12	Tuesday	Regular class work resumes
MAY	16-17	Mon.-Tue.	
	18-19	Wed.-Thur.	Spring Quarter Examinations
	19	Thursday	Graduation Exercises

First Term, Summer Quarter 1977

JUNE	6-7	Mon.-Tue.	Orientation for new students not pre-registered Registration by appointment
	8	Wednesday	Day classes meet on schedule
		1:30 p.m.	Change of schedule and late registration
	10	Friday	Last day for registering or adding first term courses
JULY	4	Monday	INDEPENDENCE DAY HOLIDAY
	11	Wednesday	Last day for registering or adding second term courses
AUGUST	15-16	Mon.-Tue.	
	17-18	Wed.-Thur.	Summer Quarter Examinations
	18	Thursday	Graduation Exercises

The University of Southern Mississippi adheres to the principle of equal educational and employment opportunity without regard to race, sex, color, creed, or national origin. This policy extends to all programs and activities supported by the University.

The USM Recreational Sports Department invites you to participate in your action-packed sports program. The program includes Intramurals, Sports Clubs, Information Recreation, Outdoor Recreation, and Special Events. There are over 80 activities offered featuring individual, dual, and team competition. It is broad enough to meet group needs and specific enough to meet individual needs. Seventeen sports clubs are available to all interested persons.

The total number of participants in the program is 6,170 of the total enrollment at USM, This figure includes both male and female. Accept our outward reach, and join the action.

15 SESSIONS: JUNE — AUGUST 1977

Sessions are assigned on the basis of earliest application by colleges and schools.

Write: Mini Quarter, Southern Station, Box 11, Hattiesburg, Miss., 39401

ATHLETICS

The University's Department of Intercollegiate Athletics has sought for many years, and is still seeking, to keep its growth and expansion on a par with that of the overall institution.

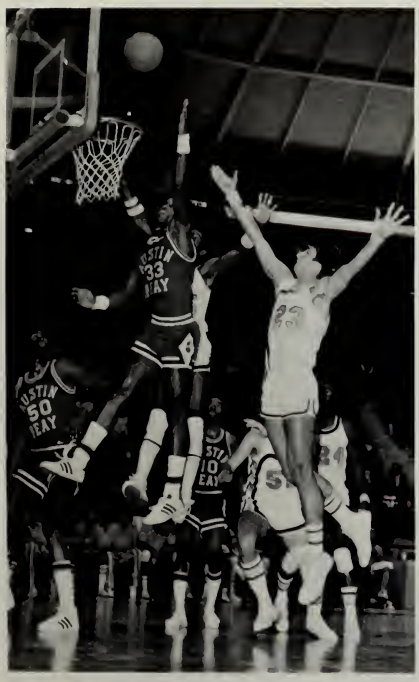
USM is ranked as a Division 1 (major college) independent by the National Collegiate Athletic Association (NCAA) and follows all the standards and regulations set forth by that organization.

Prior to attaining Division 1 rating in the early 1960's, Southern's football teams twice won the national 'small college' grid title as chosen by one of the major wire services. In addition to the two mythical crowns, the Golden Eagle gridders have three times ranked No. 1 nationally on total defense (since becoming a major team).

Southern's grid prominence is certain to be enhanced by the completion of a renovation project that will double the size of its grid stadium (the new capacity is 36,000).

The University also fields varsity teams in basketball, baseball, tennis, and golf, and has excellent facilities for each sport. One of the most attractive and useful athletic buildings is the Reed Green Coliseum, which seats 9,200 for basketball and approximately 10,700 for other events.

Addition of varsity competition in other sports is anticipated.



GENERAL INFORMATION

C L E P

The College Level Examination Program (CLEP) offers good students the opportunity to receive college credit by examination. CLEP, sponsored by the College Entrance Examination Board, includes two types of examination, subject and general.

Subject Area Examination may be taken by a student of any age who has not earned college-level credit in the subject area for which he seeks credit.

The CLEP General Examinations are restricted to the more mature student who has been out of high school for at least two years. A student with an appreciable amount of college credit may not earn credit through the use of this examination. Credit will be awarded for each area the student scores at the 50th percentile or higher.

Career Development Center

The Career Development Center was established by the University to serve as an agency in which current and projected information about careers may be obtained and in which the individual may come to obtain directions for moving toward career objectives. In order to meet these needs, the Center provides the following services:

Career Information Service contains a collection of current and projected career related materials pertaining to a wide range of career fields of interest to citizens of the State of Mississippi.

Career Communication Service prepares, edits and disseminates through various communication media career information and opportunities for use by the general public, students, counselors, teachers, administrators, ministers, and others.

USM Cooperative Education Program

Cooperative Education at USM is the integration of classroom theory with practical experience under which students have specific period of attendance at the college and specific periods of employment. It is important that: (1) the student's work should be related to his field of study and individual interest in the field, (2) the employment must be considered to be a regular, continuing and essential element of the education process, and (3) the working experience will ideally increase in difficulty and responsibility as the student progresses through the academic curriculum.

SOUTHERN EXPOSURE . . .

. . . that's entertainment!

The American public has long been enthusiastic about entertainment . . . an opportunity to sit back, relax, tap feet and enjoy a good show.

American music has been the proper ingredient, together with the right director, singers and dancers to form that toe tappin', fun loving show.

Southern Exposure, under the direction of Michael Howard, is composed of those proper ingredients to produce e-n-t-e-r-t-a-i-n-m-e-n-t.

Audiences in high schools, junior colleges, conventions, civic groups, young and old, male or female have stood and applauded this excellent group, always calling for more.

From Avon, Mississippi, to the Superdome, to a thirty-minute ETV special from Smith Park in Jackson, from Vicksburg to Waynesboro and Greenwood to the Coast, the University of Southern Mississippi has been represented by the ambassadors of good will and entertainment.

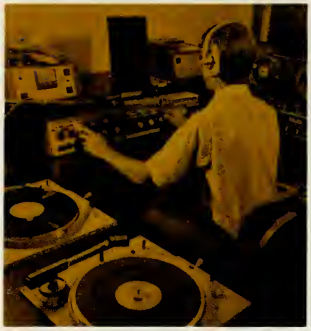
They have more than eighty performances to their credit and have performed for more than 50,000 happy people since their first show in late November, 1975.

. . . TRAVELIN' MUSICAL SHOW

look at enthusiastic collegians, serving their University, presenting a quality performance . . and, that is what Southern is all about, all the time . . . a quality performance in teaching, research and service.

Twelve dedicated singers and dancers make up the cast, backed by three accompanists and a road crew of three. They have traveled the highways of Mississippi, doin' their thing — and that is entertaining people, giving them a brief

ACADEMIC ORGANIZATION



COLLEGE OF LIBERAL ARTS

The College of Liberal Arts reflects the general educational responsibilities of the University, and, while it endorses career oriented disciplines, there is also the larger dimension of emphasizing cultural values. The College boasts a faculty of the highest quality and this is reflected by an impressive academic record of publication and scholarly activity. Despite heavy teaching responsibilities and the rarity of released time, the following statistics reflect the commendable production by the Liberal Arts faculty during the past year: 11 books; 56 scholarly articles; 15 book reviews; 65 poems and articles published or accepted for publication; and 70 papers read before professional meetings. The College is organized into thirteen departments offering a broad cultural and educational experience, with specialized disciplines in major and minor fields, as well as pre-professional programs. These are as follows: Aerospace Studies; Philosophy and Religion; Criminal Justice; English; Foreign Languages; Geography; History; Journalism; Military Science; Political Science; Para-Legal; Sociology; and Speech and Hearing Sciences. In addition there are a number of interdisciplinary programs such as Advertising, American Studies, Community and Regional Planning, Latin American Studies, Linguistics, Social Studies, the Teaching of English to Speakers of Other Languages, and Radio, Television and Film. The College offers the baccalaureate, master's, and doctoral degrees.

COLLEGE OF EDUCATION AND PSYCHOLOGY

The College of Education and Psychology offers career-oriented programs at the undergraduate and graduate levels for students pursuing teaching or non-teaching careers.

These programs are administered through nine departments which strive to maximize pupil learning.

The departments include Business Education — preparatory experience in areas related to business teacher education; Counseling and Guidance — undergraduate social and rehabilitation services; school, college, community counseling, and counseling psychology at the graduate level.

Curriculum and Instruction — programs which range from nursery school through middle grades education to secondary education are offered. Graduate offerings include those in elementary education, early childhood education, reading, and secondary education.

Educational Administration and Supervision — involves graduate programs in administration, supervision, and other areas. Special Education — offers degree programs, through the doctorate, for competencies in areas of retardation, specific learning disabilities, et al.

Industrial and Vocational Education — industrial arts and industrial vocational education programs include teaching and non-teaching, plus graduate programs in industrial arts (teaching) and industrial and vocational education.

Library Science — programs include undergraduate ones for elementary and secondary school library media specialists and library science, non-teaching. Psychology — undergraduate, master's and doctoral programs are offered.

Research and Human Development — adult education, educational research, and educational media and technology are available.

Service Components are available and the department coordinates educational foundation offerings in the teacher education program.

In addition, the Science Teacher Education Program offered by the Department of Science Education is cooperatively administered by the College of Education and Psychology and the College of Science and Technology.

SCHOOL OF HEALTH, PHYSICAL EDUCATION AND RECREATION

The School of HPER provides sound programming to meet students' career needs in three areas: academic, recreational services, and community services.

The School has four major departments: Health, Physical Education, Recreation, and Athletic Administration and Coaching. Undergraduate and master's degrees are offered in all areas, while a doctoral degree is offered only in Physical Education.

The Department of Health offers health education, inservice drug education, and driver education. Traditional teacher preparation curricula provides programs in the Physical Education Department, including elementary school physical education and a program of certification in corrective therapy.

The Recreation Department offers community recreation, resources, planning and management, therapeutic recreation, outdoor education field trips, and internships in community recreation centers and State Park Systems. The Athletic Administration and Coaching Department offers programs in coaching and certification in aquatics and athletic training.

In the developmental stage are short term courses in snow skiing, physical education and recreation in foreign countries, and outdoor camping and campground development.

Recreational services include Intramurals; a sports club program for intercollegiate competition in swimming, volleyball, cross country, and women's basketball and tennis; and a recreational loan program for checking out available sports equipment for recreational use.

The community service program enables citizens of the greater Hattiesburg area to participate in programs utilizing facilities and expertise within the School, such as learn-to-swim programs, motor skill developmental day camp programs, and summer camp programs for handicapped children.

THE COLLEGE OF FINE ARTS

The primary purpose of the College of Fine Arts is to provide its students with a well-rounded preparation for professional or teaching careers in one of the many branches of art, dance, music, or drama. The College offers the bachelor's, the master's, the specialist's, and the doctoral degrees. It also seeks to provide opportunities for students in all departments of the University to participate in artistic activities and to develop an awareness of cultural values.

Performing organizations in the College of Fine Arts are designed to reinforce the academic training offered and to give the student of art, dance, music, or theatre the kind of in-depth, concentrated training necessary for a career in any branch of the arts.

Home of the nationally televised "Pride" Marching Band and the Dixie Darlings, the College of Fine Arts also boasts such celebrated organizations as University Singers, Studio Singers, University Symphony Orchestra, University Symphonic Band, Jazz Lab Band, and a number of smaller instrumental and vocal ensembles which afford the artist-student the experience of audience rapport which is a prerequisite for performance poise.

Both large and small productions in the areas of theatre, opera, musical comedy, and dance make possible "learning by doing" in techniques which apply to the broad spectrum of backstage chores as well as to major roles behind the footlights. The valuable experience gained by the strenuous schedule of a production deadline reinforces the more academic classroom experience by offering practical knowledge necessary for a career in the performing arts.

The Department of Art makes possible public showings of student works by presenting regularly art exhibitions both on campus and on tour.

Art students in the College of Fine Arts achieve marketable development of talent as exhibiting artists and in the world of commerce, as well as in the teaching professions.

COLLEGE OF SCIENCE AND TECHNOLOGY

The College of Science and Technology offers a blend of traditional and innovative programs in science, technology, and mathematics. Twenty bachelors level degree programs, ten pre-professional programs and seventeen graduate curricula are available from the College. The faculty of the College of Science and Technology take pride in providing a quality learning environment. With emphasis on Teaching, Research and Service, the College offers unlimited opportunities to the serious student. In addition to normal classroom and laboratory teaching, a spectrum of individualized instruction is available from remedial and developmental instruction for beginning students at tutorial and learning centers, all the way to special junior and senior level research projects. In addition, faculty members in the student's major field offer special personal career counseling and job placement assistance.

There are over 100 faculty members within the College of Science and Technology which allows each course to be taught by a true expert in the field. The faculty maintain their expertise through creative teaching and vigorous research programs. Last year, the faculty published 126 research articles and presented 105 technical papers. The topics being investigated range from basic to applied and community service oriented research.

Industry advisory boards have been established to assist with continuing curriculum review and improvement in several programs. These advisors ensure that our programs remain up to date, practical and pertinent. Through industrial and other support, several departments within the College of Science and Technology offer undergraduate scholarships. Inquiries should be made to each department for details.
In short, quality programs supported by a distinguished faculty, productive research, and excellent facilities are available in the College of Science and Technology. Students are cordially invited to visit the College of Science and Technology first hand before making a decision on their college career.

COLLEGE OF BUSINESS ADMINISTRATION

The College of Business Administration, under the able leadership of Dean Joseph A. Greene, was established as a separate professional school in 1957. The College, divided into five academic departments — Accounting, Economics, Finance, Management, and Marketing — is highly recognized by employers seeking well-qualified graduates at the bachelor's or master's level. The success of graduates from the College in seeking higher degrees at other universities is also excellent evidence of quality education offered by the College.

In addition to the five academic departments, a Bureau of Business Research is highly recognized as an integral part of the College of Business Administration. Through its activities significant contributions have been made with business research being provided under the direction of a capable staff and, when needed, assisted by select graduate students.

Extensive projects have been undertaken at the state as well as at the community level. Increased emphasis is thereby placed upon responsible, professional research, writing, and professional development of faculty members and graduate students within the College.

With five strong academic departments, the Bureau of Business Research and an office of the Coordinator of Graduate Studies in Business Administration, the College of Business Administration is meeting its objective of assisting its students in achieving the proper education to reach their maximum potential after graduation. The young men and women who study in the College are provided with the opportunity for a liberal education as well as the professional training. They are prepared to be flexible in their thinking and adaptable to change as well as knowledgeable in their chosen fields. Thus, they are given help in preparing not only for careers but also for satisfactory lives as constructive citizens.

SCHOOL OF NURSING

The School of Nursing was established in July 1966 and opened officially at the beginning of the 1967-68 academic year with an enrollment of seven students. In the years that followed, the School has experienced a rapid growth. The fall 1975-76 enrollment was approximately 522 students, 15 per cent of whom were male.

Completion of the nursing program leads to the Bachelor of Science degree in Nursing and establishes eligibility to take the State Examination for licensure to become a Registered Nurse (RN). The course of study can be completed in a minimum of three years in the case of exceptional high school graduates who attend 12 months a year. For those persons transferring from junior or senior colleges the time requirement for the degree will be commensurate with the number of transferable hours.

In order to meet the requirement for additional physical facilities for faculty and students, a new School of Nursing Building was ready for occupancy in June, 1975. The USM School of Nursing is fully accredited by appropriate national and state agencies, including the National League for Nursing, and is a member of the Council of Baccalaureate and Higher Degree Programs of the National League of Nursing.

Emphasis at the University of Southern Mississippi's School of Nursing is to provide opportunities to acquire the knowledge and skills to practice nursing. This nursing may be a hospital, a nursing home, a doctor's office, a community nurse who visits throughout the county, the Armed Services, or the Peace Corps in a foreign country.

SCHOOL OF HOME ECONOMICS

The School of Home Economics is dedicated to the preparation of students for family life as well as for profitable careers in business and industry.

The two options offered in the area of Environmental Design are Clothing and Textiles and Clothing Merchandising. Environmental design courses and supporting courses in clothing construction are offered quarterly. Students are given the opportunity to attend the fashion markets.

The Department of Family Life Services offers a program leading to a Bachelor of Science degree with majors in child development, marriage and family living, and home economics in equipment. A two-year course in child development which leads to a certificate is available for Head Start and Day Care Center directors. Child Development majors are certified to teach N-K. The graduate program offers a Master of Science degree in Child Development and Marriage and Family Living.

The Nursery School and an Infant Development Center are the laboratories to provide experiences for students in observation and participation. Nursery School accommodates children between the ages of three and five years. The Infant Development Center provides experiences in learning with children less than three years of age.

Home Economics Education majors are approved under the NCATE program which grants reciprocal certification in forty states. Graduates receive a vocation secondary teaching certificate. At the graduate level, a Master of Science degree in Home Economics Education offers an opportunity for enrichment and more comprehensive study in the various areas in which teaching is involved. Occupational programs and curriculum development are strengthened.

The Department of Institution Administration offers Bachelor of Science degrees in Institution Management, Institution Management-Dietetics, Food and Nutrition, Hotel and Restaurant Administration, and a two-year certificate for School Lunch Managers. The Master of Science degree in Institution Management and Food and Nutrition is also offered. The department operates a quantity food laboratory, the Charcoal Room, and a nutrition clinic on the campus to provide experiences for students. Additional experiences are provided in hospital and school cafeterias.

Home Economics at USM is a field of study that adapts itself to constantly changing socio-economic and technological fields, depending on techniques and sciences as a means not as an end.

Intramurals, athletics, academics, majors, people, places, buildings, activities, spirit, and much more are whirling around following your brief tour through this book.

And, why shouldn't they be? You have been on the outside looking in.

Come on in, be a part of Southern, the view is great, from the inside out, that is.

Things just seem to fall into place when you get to Southern . . . you take your place and everything you need is there, truly Where Tomorrow is Today!

usm where TOMORROW is TODAY

This phrase represents the very heart of the ambitious task of preparing you and thousands like you to make for yourself a meaningful and profitable life.

The faculty and curricula are using the information and techniques that will be demanded by tomorrow's business, industry and education. These qualities, supported by productive research, excellent facilities, and a complete co-curricular program provide the best at the University of Southern Mississippi TODAY, to make meaningful and profitable lives TOMORROW..
